Please help!!!!!!

I cannot believe anyone would approve a mine on the banks of the Menomonee River. Do any of you realize if there is a spill it will directly go into Lake Michigan. What are you all thinking?????

Ninety nine percent of the citizens of the Menomonee County are totally against this mine but it just keeps going on. We are going to be living with polluted water and land for hundreds of years.

Let's be smart and stop this before it is too late. PLEASE!!!!!!
Do we not have any rights in this State????

Concerned citizen.
